

...To the heights of security

BOLID

About Us

The Bolid scientific-research company was found in 1991. Its field of activity is to manufacture and supply hardware and software for safety and security systems and building automation systems.

The company's mission is to improve significantly the efficiency of security and automation systems for buildings and enterprises. We are aiming to create reliable and integrated solutions that not only protect facilities, but also optimize their operation. Our team uses advanced technologies and innovative approaches to develop systems that can adapt to changing conditions and requirements of the modern world.

Our purpose is to become one of the leading companies in the world security market.

A Little History

1991 : The Bolid Company was found

1991-1997: Stand-alone devices for centralized protection of facilities have been developed

1998: Innovative security devices with RS-485 interface entered production

1999: A new hardware and software system, Orion Integrated Security System, has been developed and certified

2003: The quality management system of the Bolid Company has been certified as per ISO 9001

2004: A new production line, satellite-based vehicle tracking, has been developed

2007: The company became a leader in address fire protection system production

2008: A new production line, process controllers for building automation systems, has taken off

2010: Number of personnel exceeded 500

2013: The production facility has launched the 3^d line for surface mounting and a section for convection reflow and selective soldering

2014: The Bolid Company became a winner of Pride of Russia Awards

2016: A new production line, radio channel fire and intrusion alarm systems, has been developed

2017: CCTV equipment entered production

2018: A fire monitoring system has been developed

2019: The equipment has been put into action at one million of facilities

2021: The Bolid company celebrated its 30th anniversary with large-scale production of more than 450 types of devices and dozens of software products

2022: New production workshops and office facilities has been started to erect

2023: Number of personnel exceeded 900

2024: The head office and engineering and production complex of the Bolid Company have completely moved to a new production area of more than 20,000 sq.m.

Our Achievements

The Bolid Company is a leader in developing integrated security systems in Russia. Over 34 years, our well-known Orion Integrated Security System has found its consumers at more than 1,500,000 sites and has become the most popular in Russia.

With over 1,000 experienced professionals and growing, our team strives to improve the quality and reliability of our products, satisfying the ever-growing demands of our customers. Our capabilities include a full range of solutions for fire alarms, security and perimeter alarms in both wired and radio options, fire notification, fire extinguishing, smoke ventilation automation, including a wide range of explosion-proof products. Our systems are easy to configure, install, maintain and monitor and can be easily scalable to adapt to needs.

Every year, our company receives competitive awards for innovative products at prestigious specialized exhibitions. The manufactured equipment is supplied to the countries of the EAEU and far abroad.

Our Potential

At Bolid, about three hundred of talented engineers and programmers work on creation of new products, which ensures a high level of quality in design and implementation of promising developments in the field of security systems. Each of them brings unique ideas and a fresh perspective to the work process. Among our employees are graduates of Moscow State Forest University, Moscow Institute of Physics and Technology, National Research Nuclear University MEPhI, Mytischki Branch of Bauman Moscow State Technical University, and other prestigious educational institutions guaranteeing a high level of professionalism and technical literacy.

Our employees' willingness to continuously learn and develop, as well as active participation in scientific research and projects make them valuable specialists. Playing a key role in the development of innovative technologies, the Bolid team not only implements complex ideas, but also creates devices that can change the industry, moving the country to new technical heights.

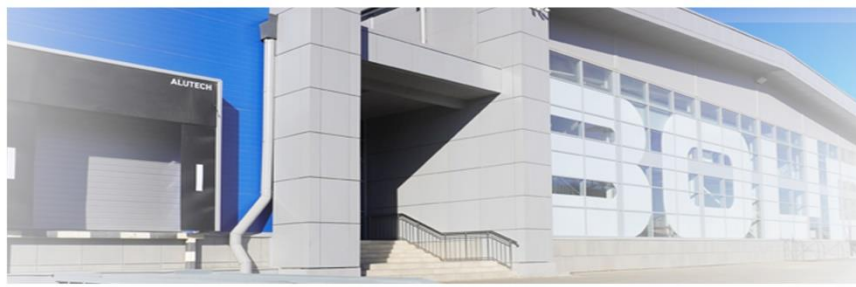

Products

With our equipment you can provide:

- ✓ *Fire protection systems: fire alarm systems, voice announcement systems, automatic fire extinguishing and smoke removal systems;*
- ✓ *Intrusion alarm systems, panic alarm systems, and perimeter monitoring systems;*
- ✓ *Access control and vehicle parking control systems*
- ✓ *CCTV systems;*
- ✓ *Building automation systems;*
- ✓ *Utility metering systems (electricity, gas, water);*

Equipment from a single manufacturer is a guarantee of compatibility, reliability, and unified software

Production

Over the years of company's existence, more than 450 types of hardware and numerous software solutions were developed.

Currently, the company's production facilities occupy about 17 thousand sq. meters involving four lines for PCB surface mounting, a section for automated through-hole mounting, two lines for wave soldering, five lines for selective soldering, three conveyor lines for assembling products into enclosures, an automated line for packing and packaging accessories, as well as a cable preparing section equipped with wire crimping and stripping machines.

Production capacities include a wide range of automated test-bench equipment for functional testing of our products. The company's quality management system is awarded with the international certificate ISO 9001-2015.

In our workshops we use state-of-the-art and high-precision technological.

Delivery

The dealer network covers major cities in Russia and CIS countries.

In addition to our own products, our sales department offers a wide range of equipment and installation materials from leading Russian and foreign manufacturers for integrated supply of all necessary equipment to any customer.

The equipment is delivered to any point in Russia and abroad and has all the necessary certificates.

Support

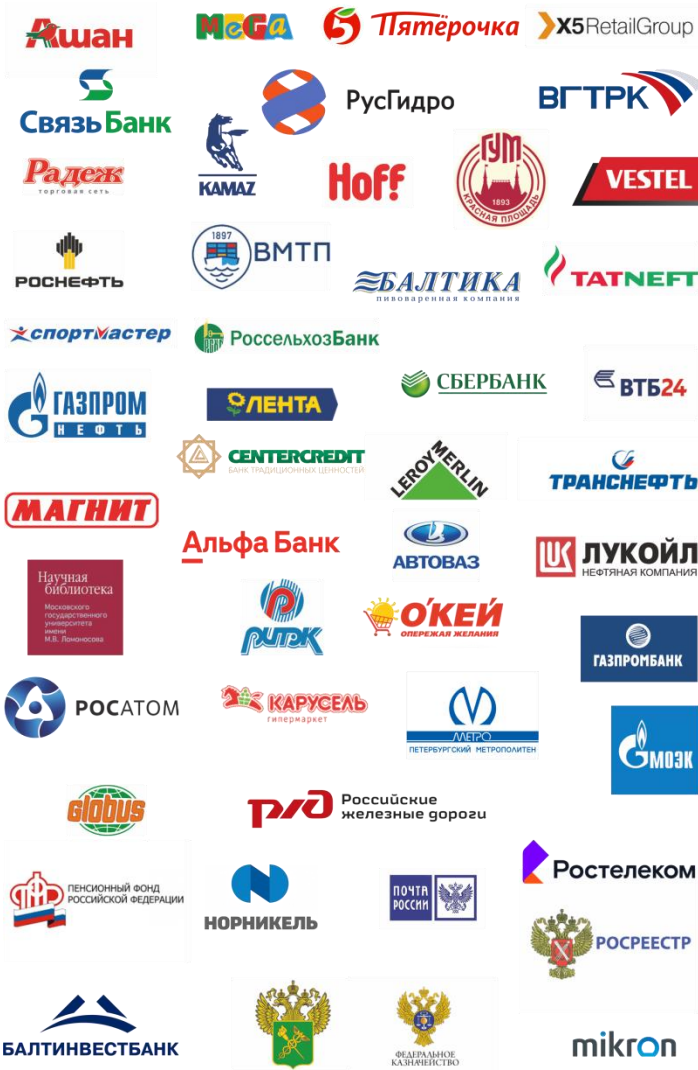

Our partners — educational institutions — have organized systematic training of specialists on issues of design, operation and maintenance of integrated security systems based on Bolid equipment.

We hold training seminars and online workshops for our clients regularly. Every year, our Moscow office hosts about 140 different seminars. More than 30 seminars are also organized annually in various cities of Russia, Belarus and Kazakhstan.

We are aiming to provide our clients with the necessary knowledge and skills to effectively use the innovative solutions provided by our company. We keep focus on new developments and trends in the industry.

Our Technical Support Team helps installers to solve all the questions arising in designing, installation, commissioning and maintenance.

For the convenience of customers, a network of 10 regional service centers has been created.
